**FURIX**

- The outer diameter of the insertion part is 6.3mm, which makes it easier to insert.
- It can be suitable for gastrointestinal diagnosis and treatment of small animals weighing as little as 600g.
- 2 million pixel high-definition images facilitate diagnosis and treatment.
- Equipped with workstation software, a computer can be used to produce case reports.
- Can be upgraded to laparoscopic system (VET-300FR).

## Scope Application

### VET-1206

The ultra-fine outer diameter is 6.3mm, which solves the problem of narrow passages for small and medium-sized animals.

### VET-1508

The universal outer diameter is 8.3mm, suitable for a wider range of medium and large animals.

### VET-3313

The extra long insertion part is 3.3mm, which solves the problem of long passage for large animals.
